Accessing the Design Thinking CMap

1. Open CMap tools and click on the Shared CMaps in Places icon

2. When the view changes go to the Tools menu and select
   Search: CMaps, Resources and Web Information

3. In the resulting dialog type in Design_Thinking_for_Business_Innovation
   including the underscores then click search

4. Hopefully the map will be found as shown below

Double-click on the listed item (which is the folder on IHMC's public servers containing the draft map).

I have set permissions for everyone to access and therefore edit the map.

5. Highlight the map named Design Thinking for Business Innovation (without underscores) using a single click then choose Add to Favourites from the Edit menu

Then close the IHMC Public CMaps window

6. From the CMap Tools window   Then double click on
   choose the favourites icon   the map name to open it

7. I hope you will be able to open and edit it – I have turned on collaborative editing in case we access it at the same time.

8. You should also be able to save it to your computer to play with.
   I'm curious to try collaboration.
