Notes:

- Email addresses listed on the Student Information Sheet will be verified. When you receive the verification email, please respond to it and ask your parents to respond to theirs.
- The Quad Ruled composition books are difficult to find in stores. They retail between \$3 and \$4 each. The physics teachers have purchased them in bulk and will sell them to you for \$2 each. You need two for this course and you may need additional ones as the year goes on as they become full.
- No calculator other than those listed is acceptable. You need your own calculator and you need to bring it to class every day.
- Any student who requires financial assistance purchasing any of these items should see their guidance counselor for assistance.
